Sean Stuart Urgel

Senior Software Engineer

Cebu City, Philippines

www.seanurgel.dev

+639985377197

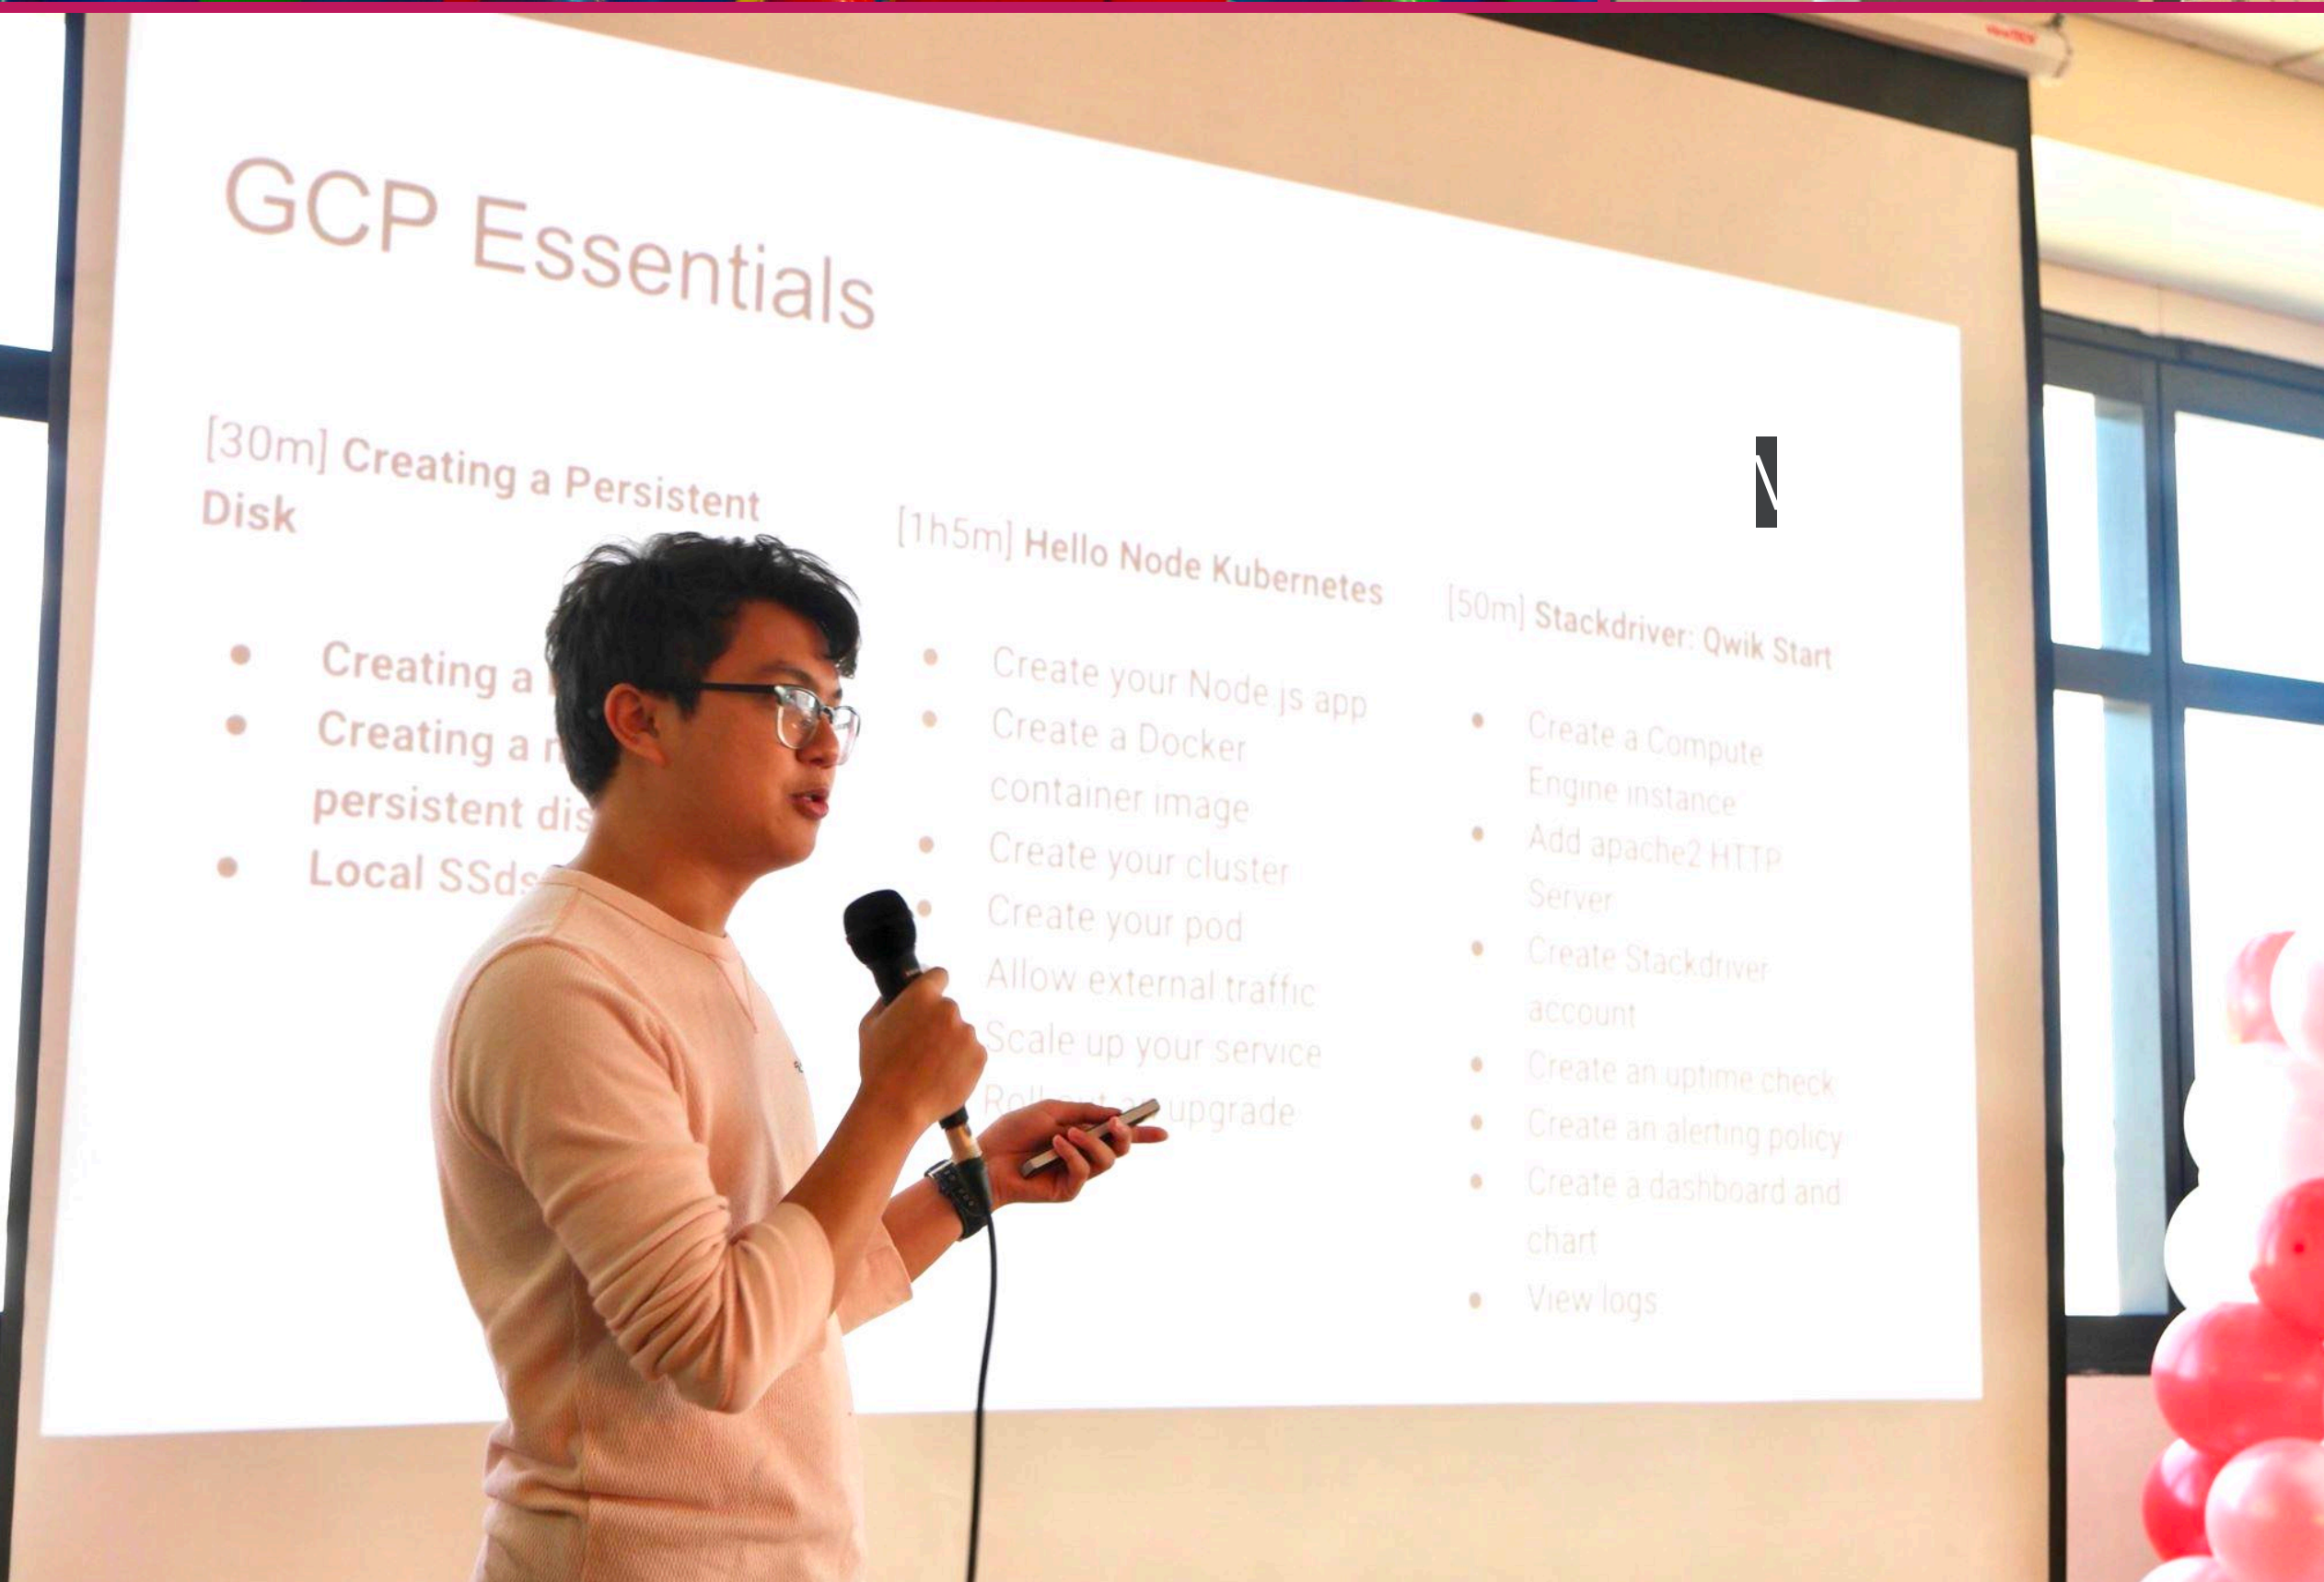

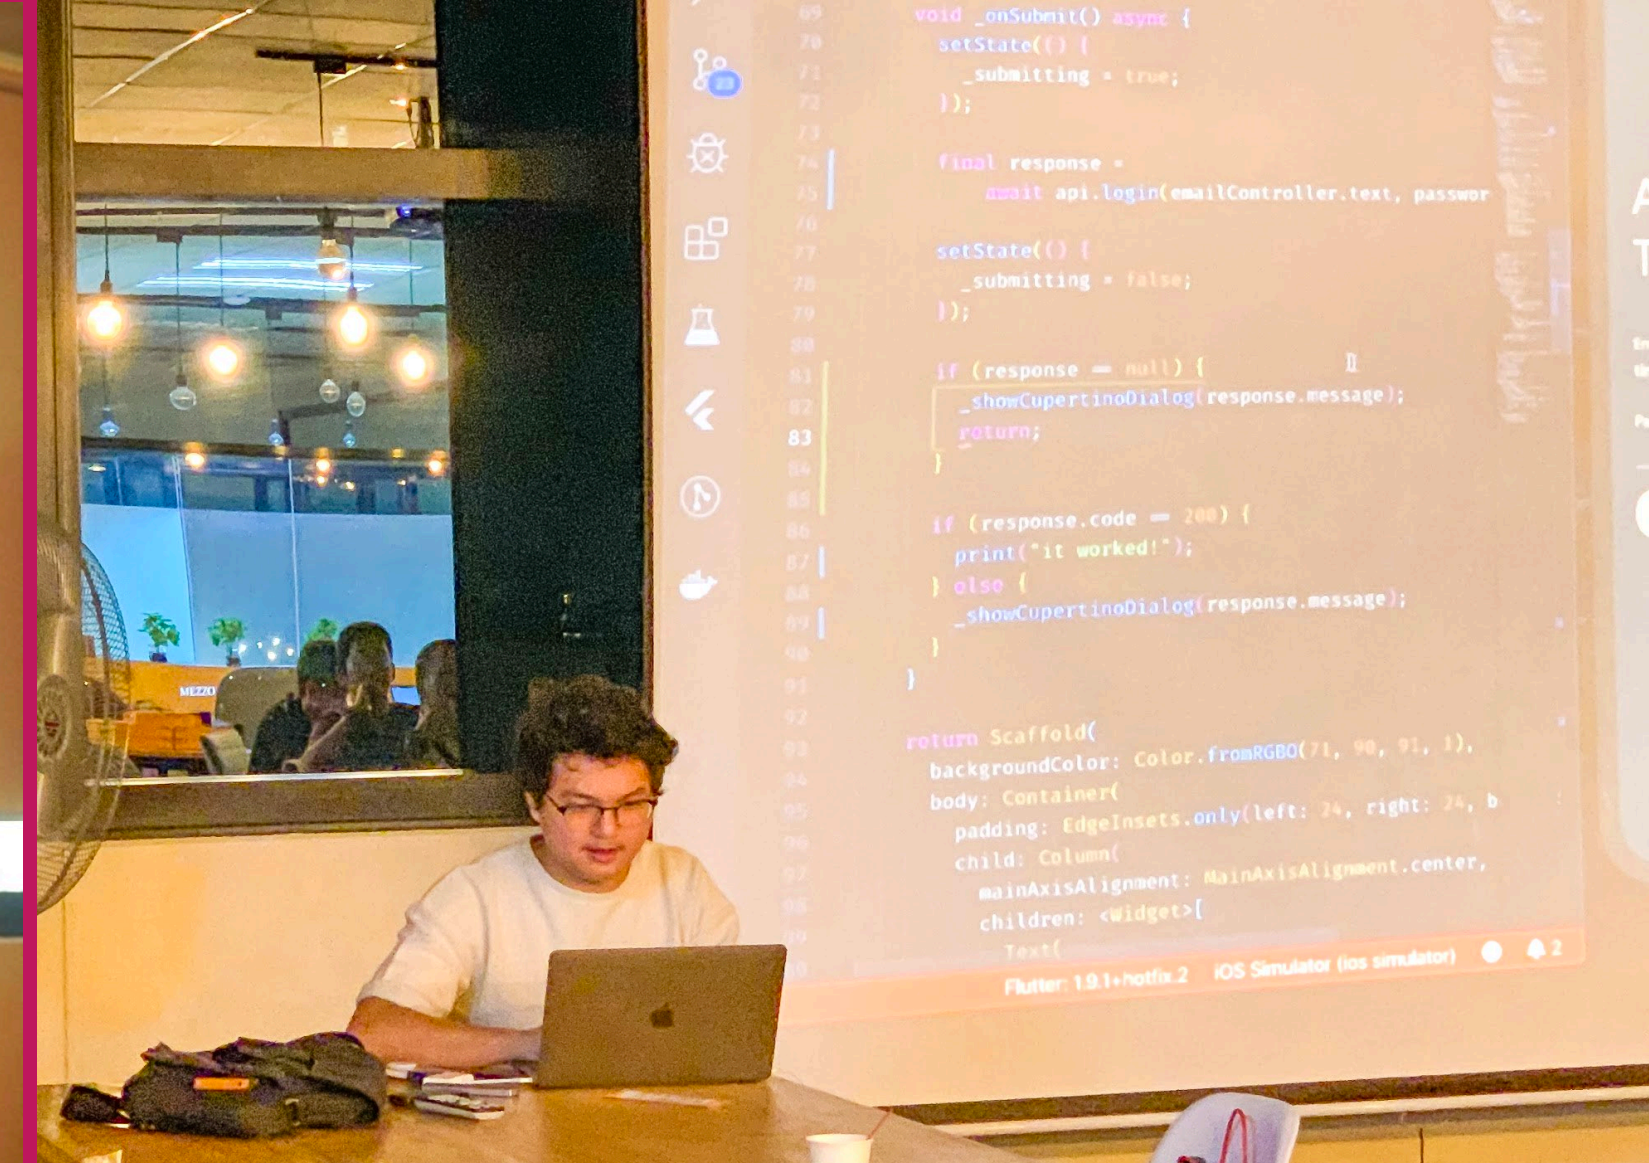

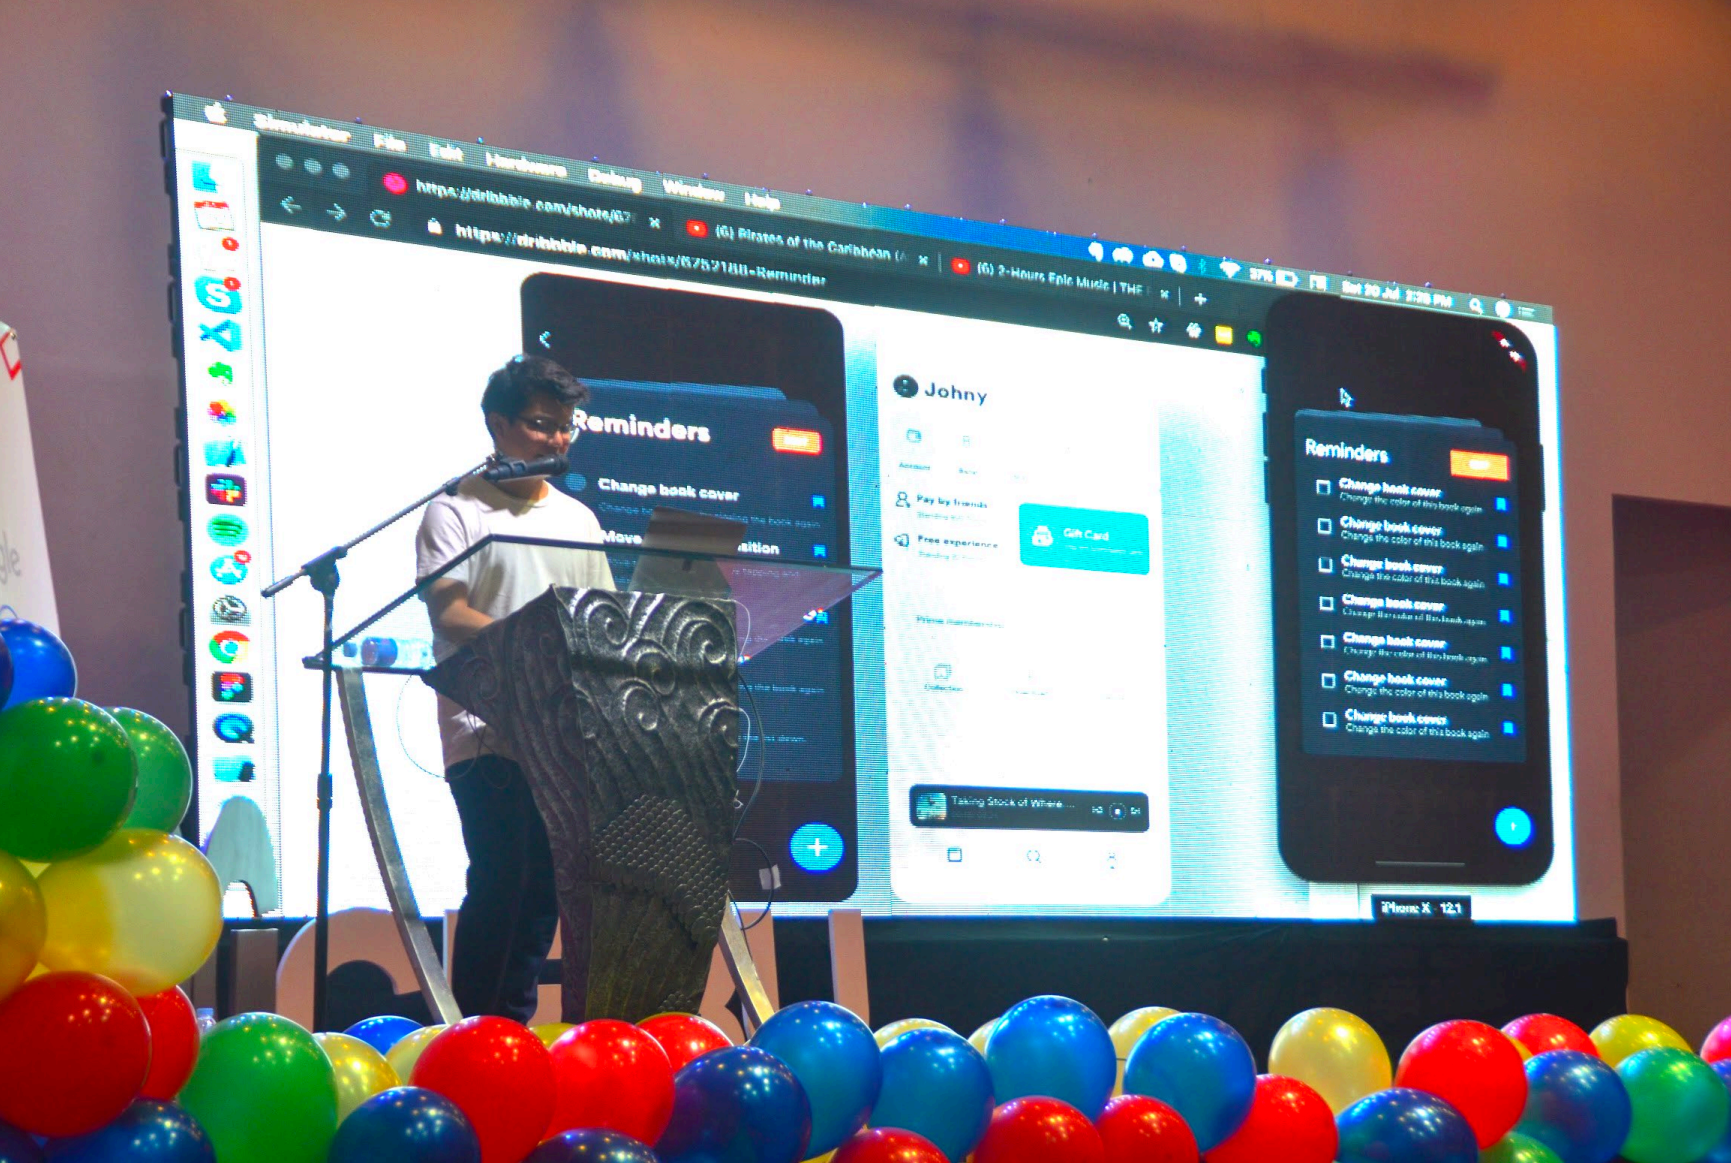

Hello!

My name is Sean Urgel, I'm Senior Software Engineer that has worked with numerous startups and businesses from **Singapore, Australia, New Zealand, Netherlands, London** and **USA**.

I help startups by creating minimum viable products (MVPs) to quickly release mobile and web apps and iterating upon it.

I also architect tech-stacks and coding conventions that allows for minimal bugs, developers to be productive as possible while shipping out features fast!

Creating an app and releasing it is one thing, but what's important is understanding the actual problem and providing a solution that will help the business succeed.

Aside from working, I enjoy joining and hosting community events such as hackathons and workshops. I do volunteer work and am currently a speaker in local tech communities such as Facebook Developer Groups Cebu and Google Developers Group Cebu.

Case Studies

Zemedy

I helped Zemedy by digitizing their solutions, their goal was to create a digital therapeutic solution to help people with Irritable Bowel Syndrome (IBS) and improve their quality of life.

As the Lead Fullstack Developer, I helped developed 2 Mobile Apps and the Company and App Website with tight deadlines as the company under-going clinical trials was being monitored by investors.

The websites were required to be extremely performant as the company was gaining a lot of traction with 50,000 monthly visitors. The apps were heavily focused on design and complicated features such as In App Purchases, Audio and Video Files and Chat Experience.

Services

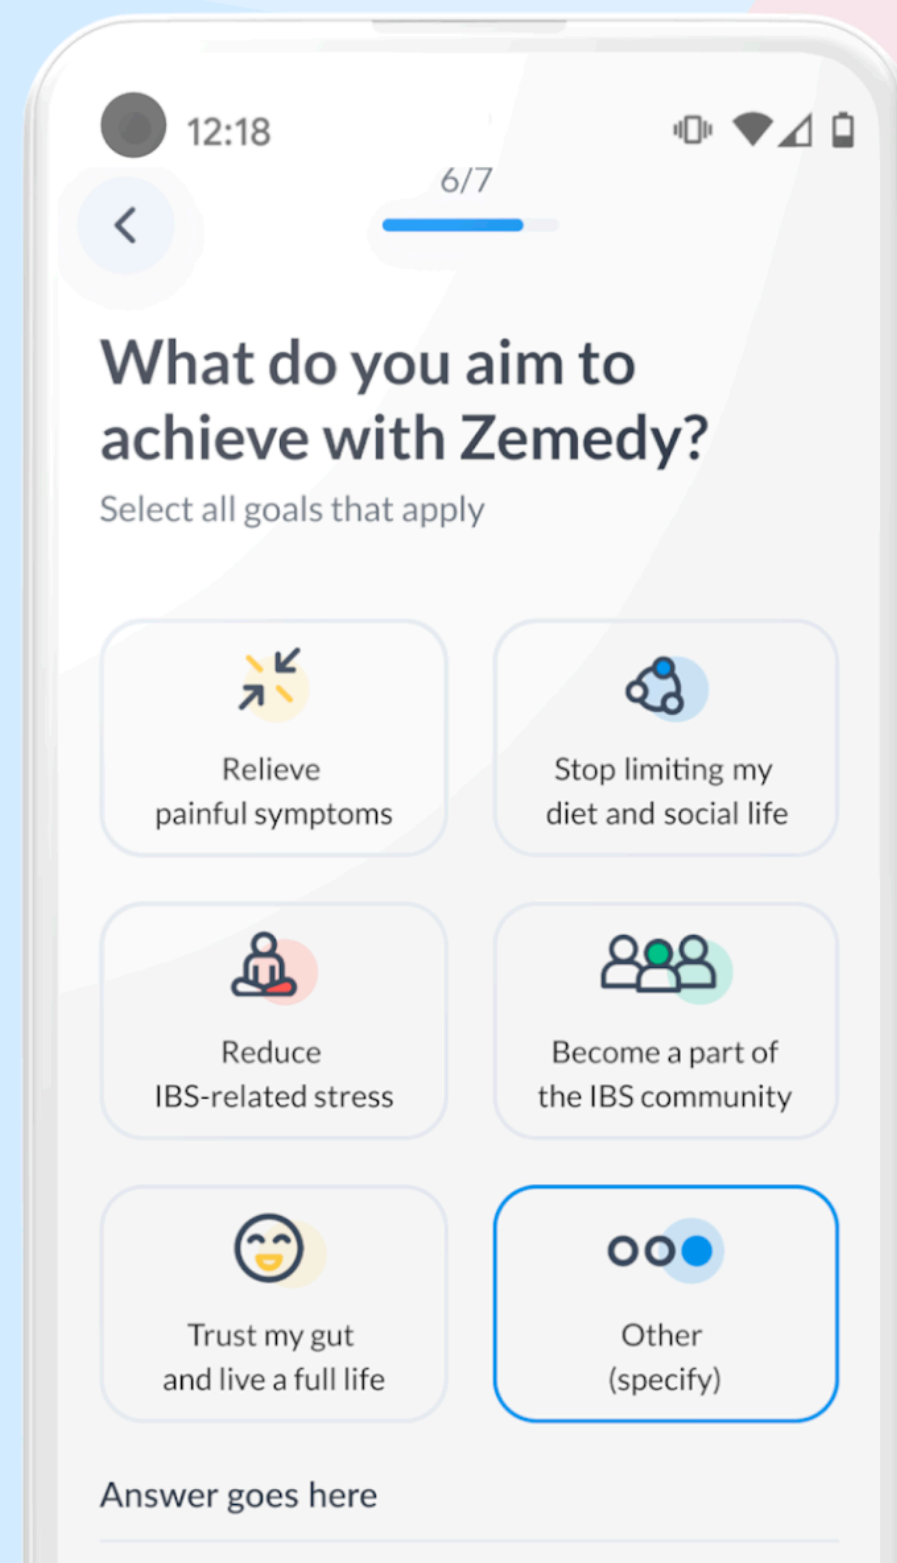

- iOS App Development
- Android App Development
- Website Development
- Search Engine Optimization
- Content Management System
- Website Performance Optimization

Impact

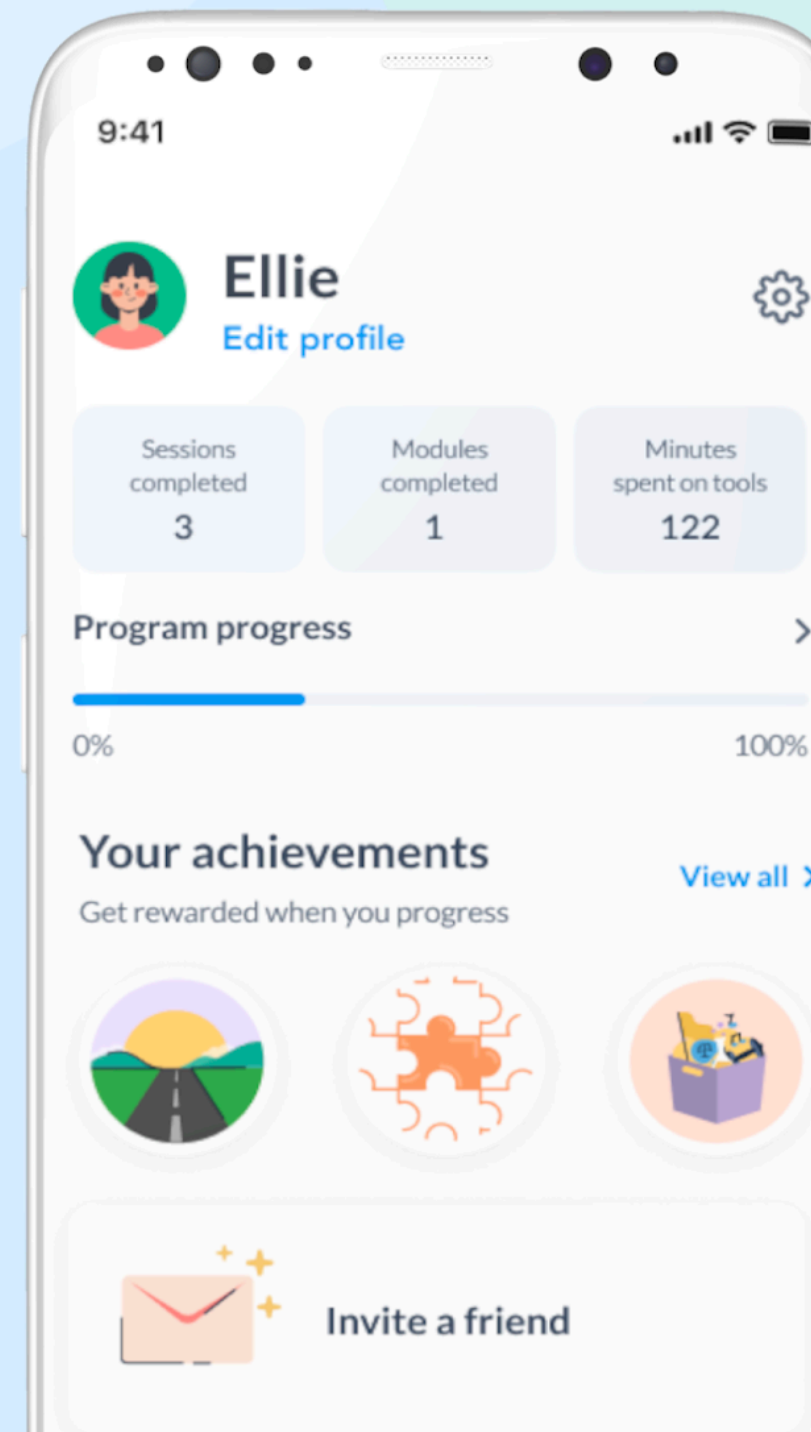

- "New apps we love 2019" in App Store
- "App of the Day 2020" in App Store
- 4.4 Rating on the Apple Store
- 50,000 monthly website visitors
- 80% Organic Page Visits

Shoretrade

While working at Station Five, we helped Shoretrade digitize B2B wholesale and trading of seafood in Australia.

As the Lead Fullstack Developer, I was the direct point person to the CEO of ShoreTrade and CEO of Station Five.

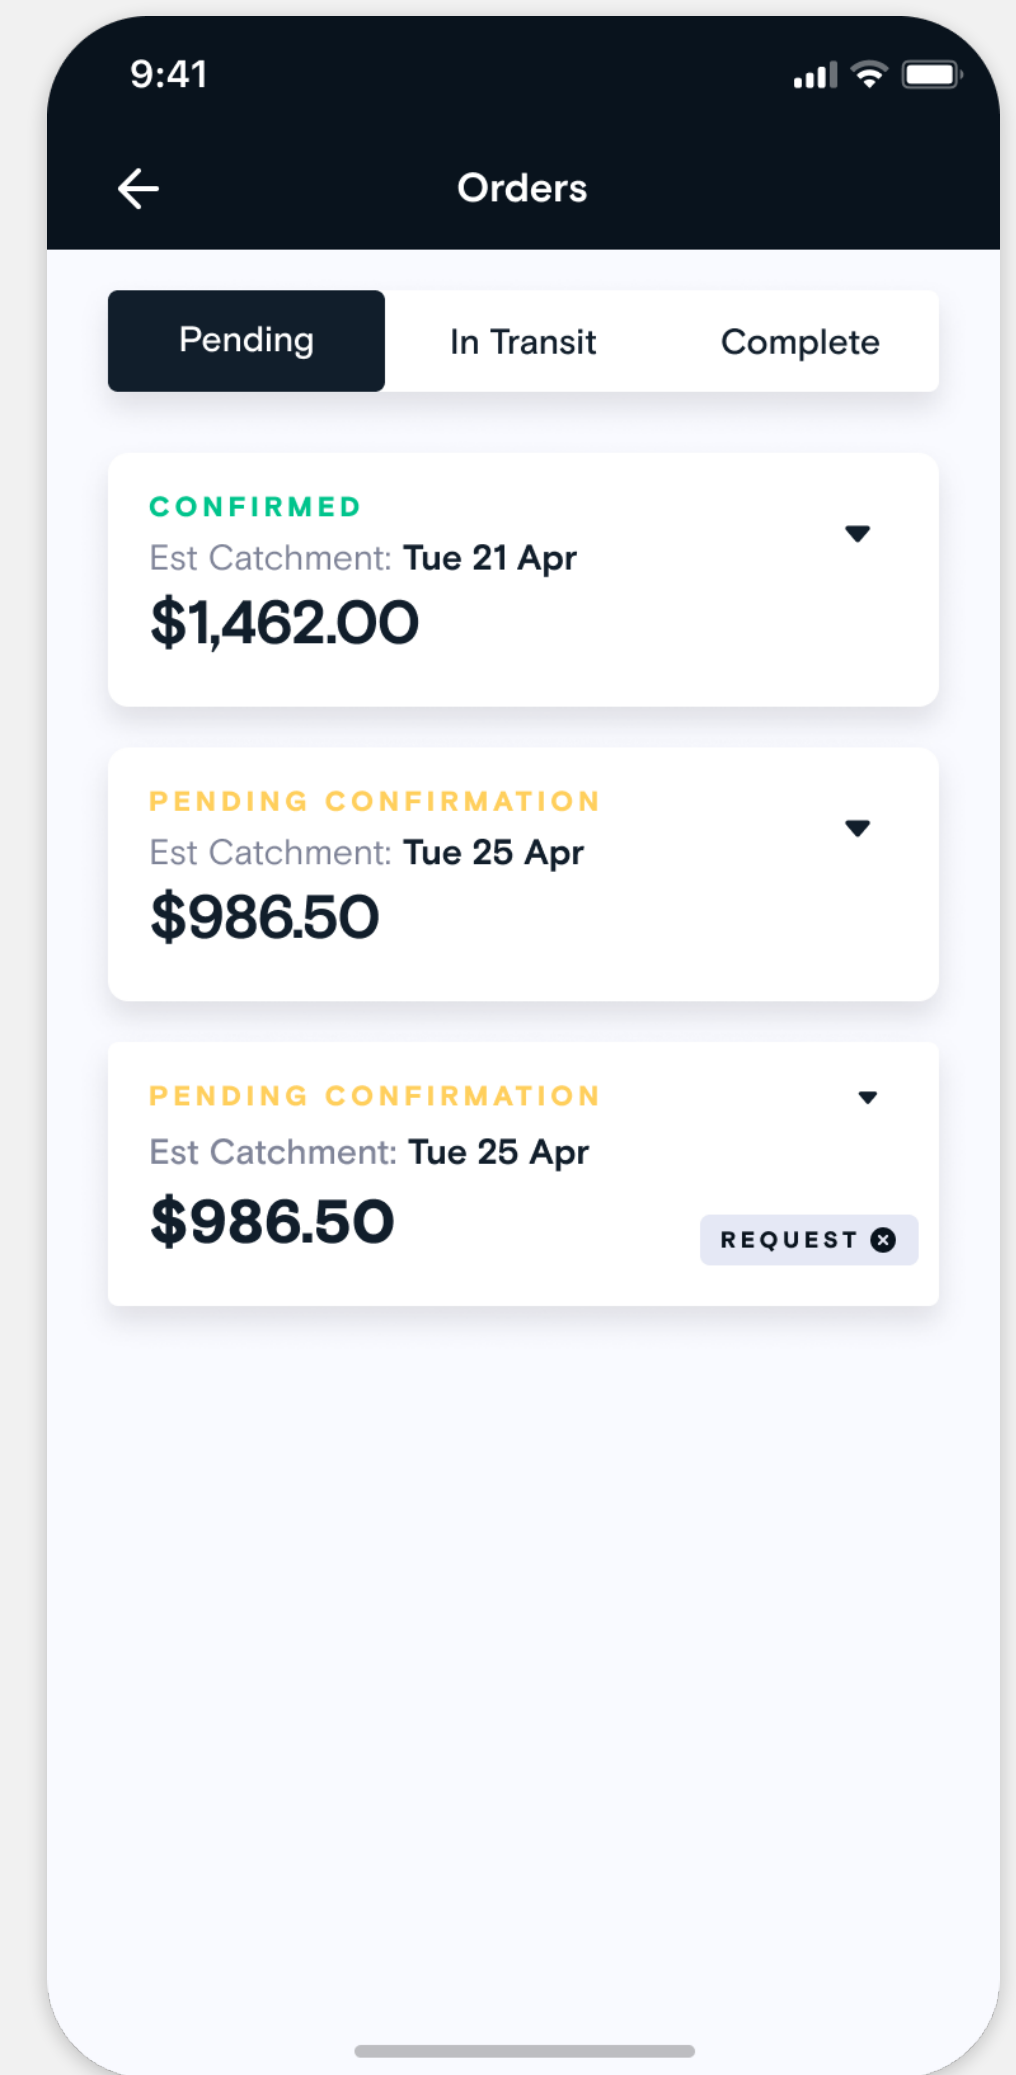

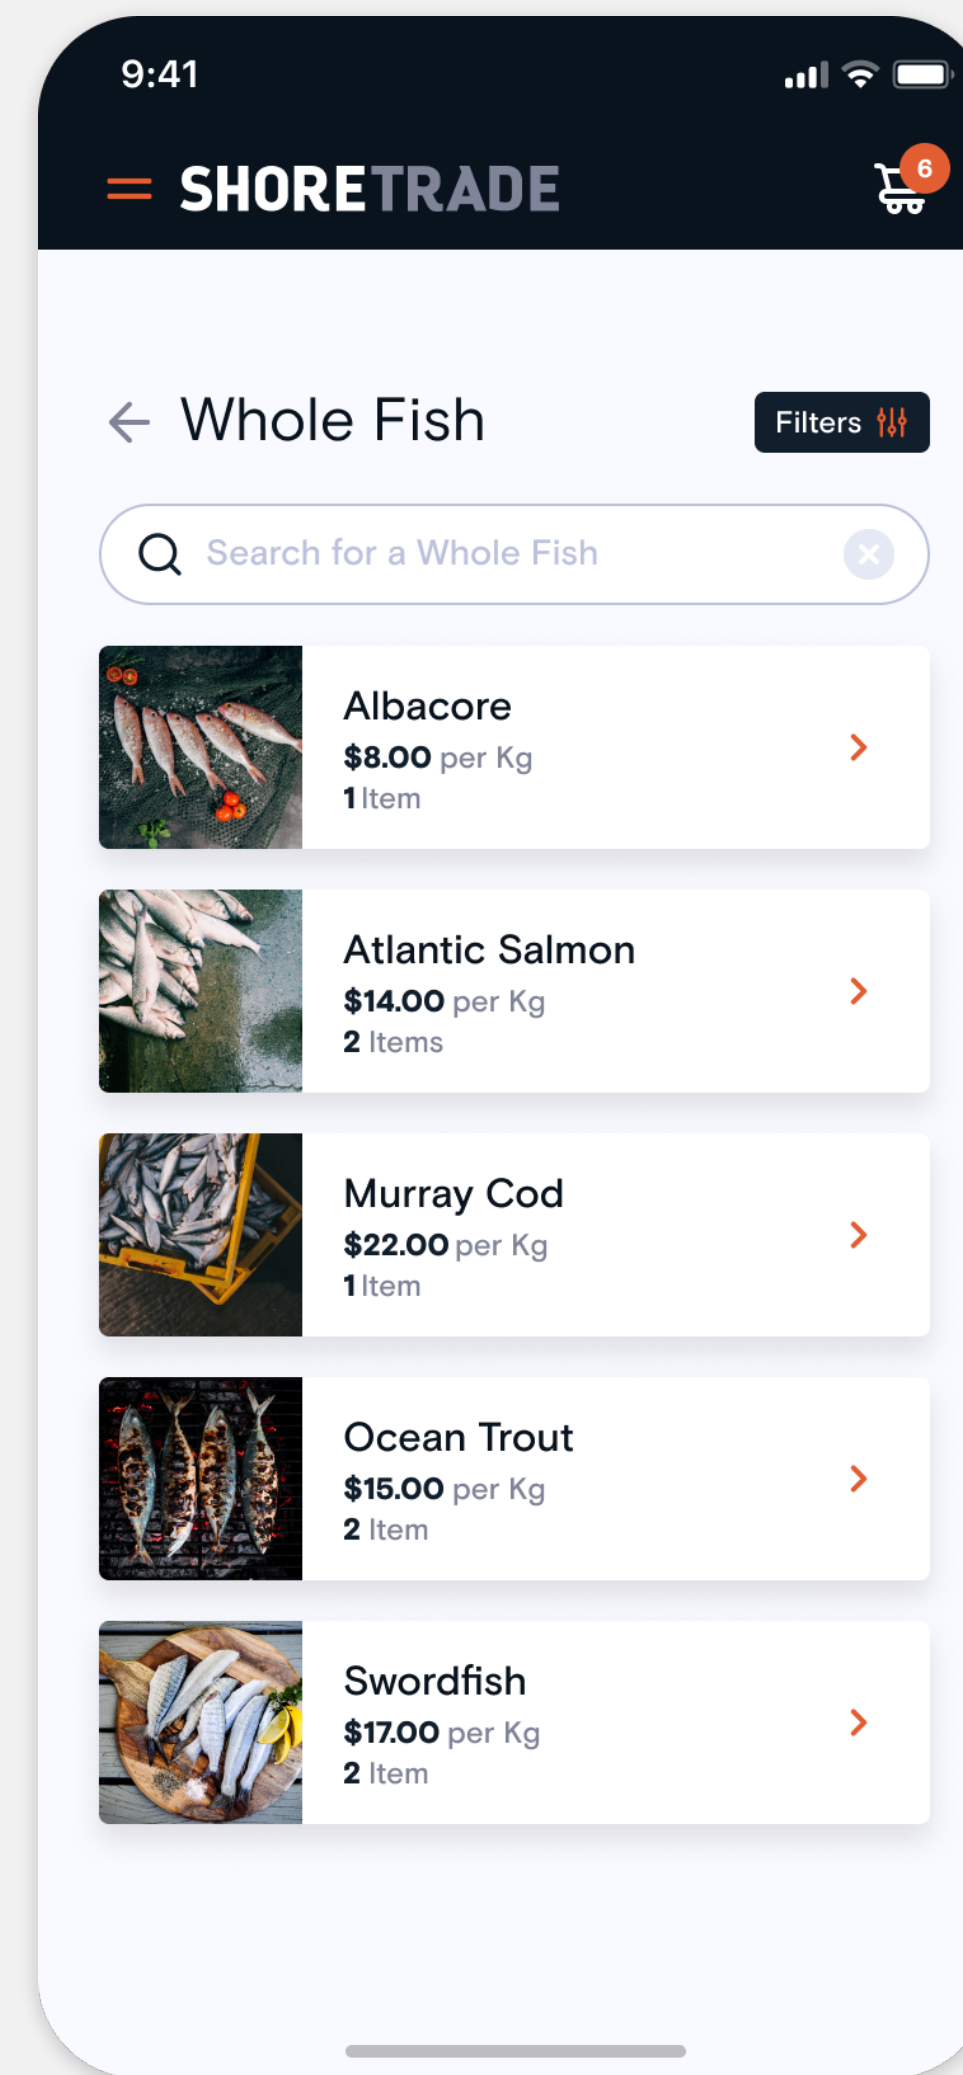

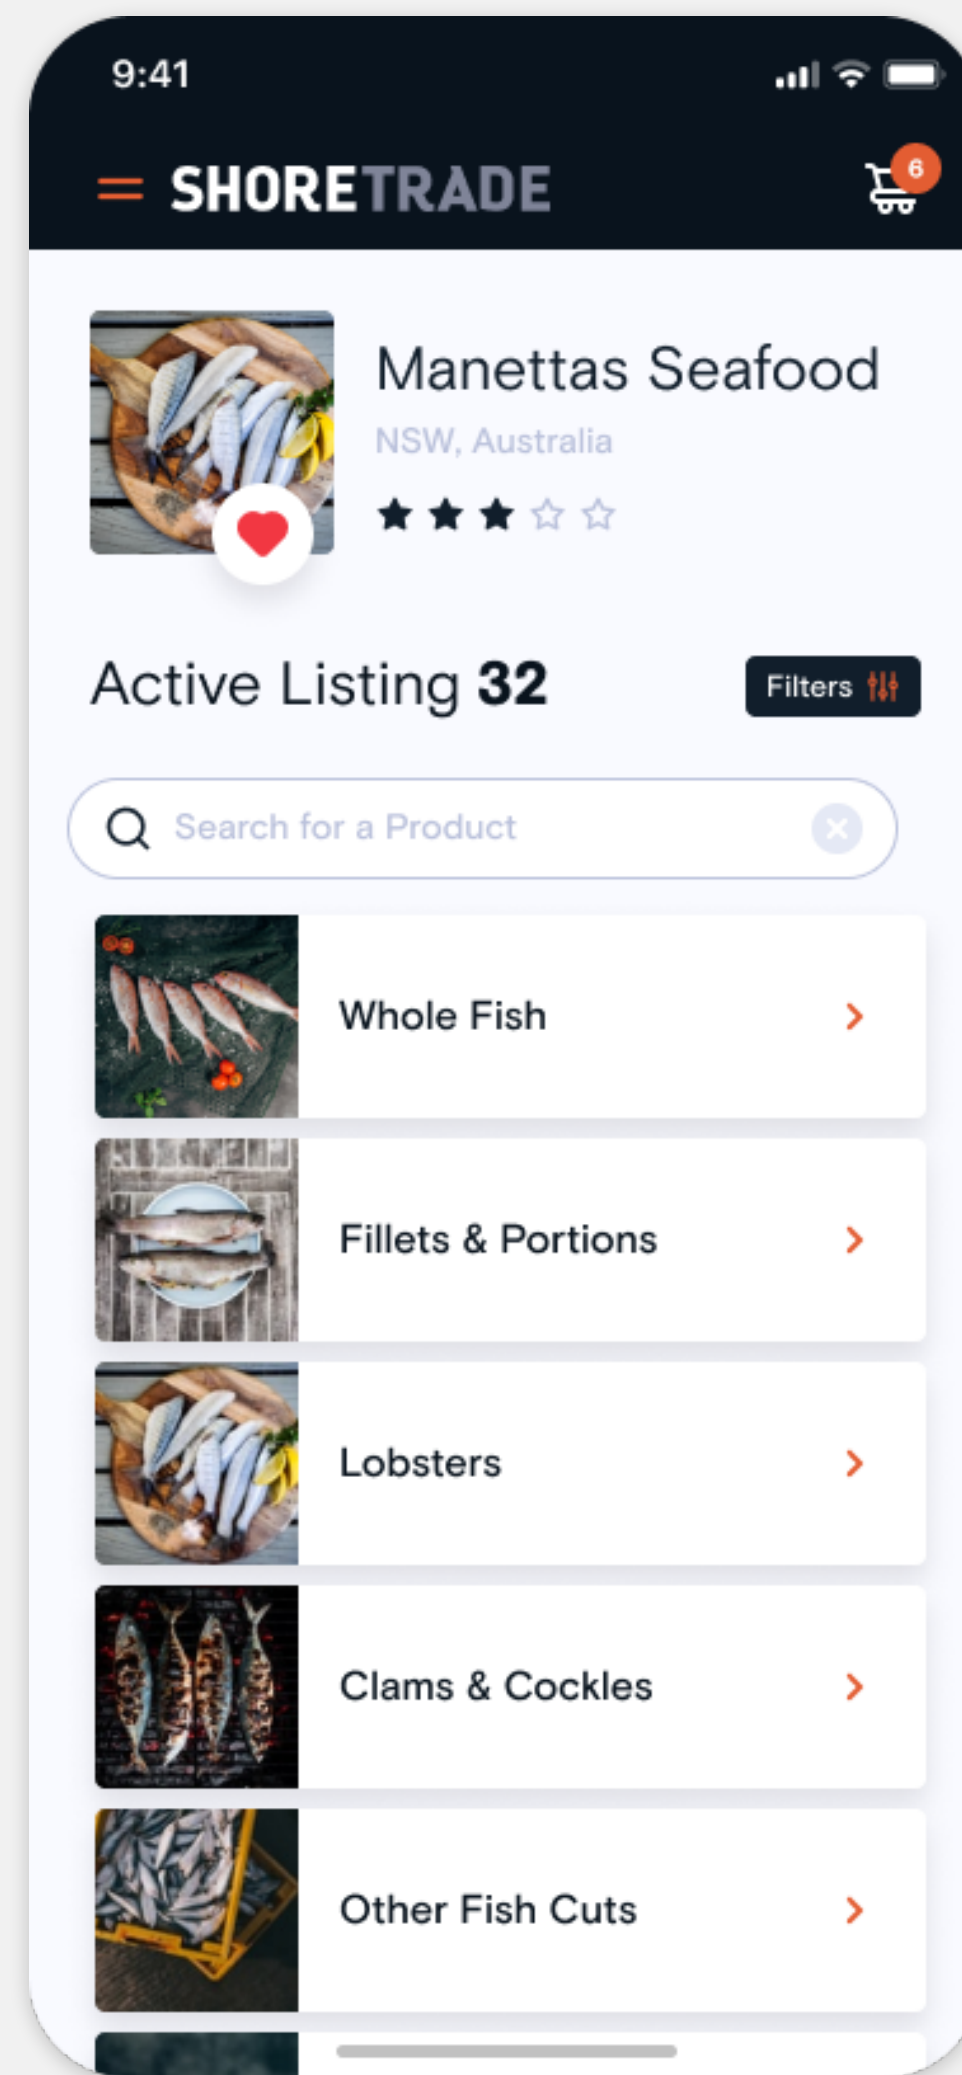

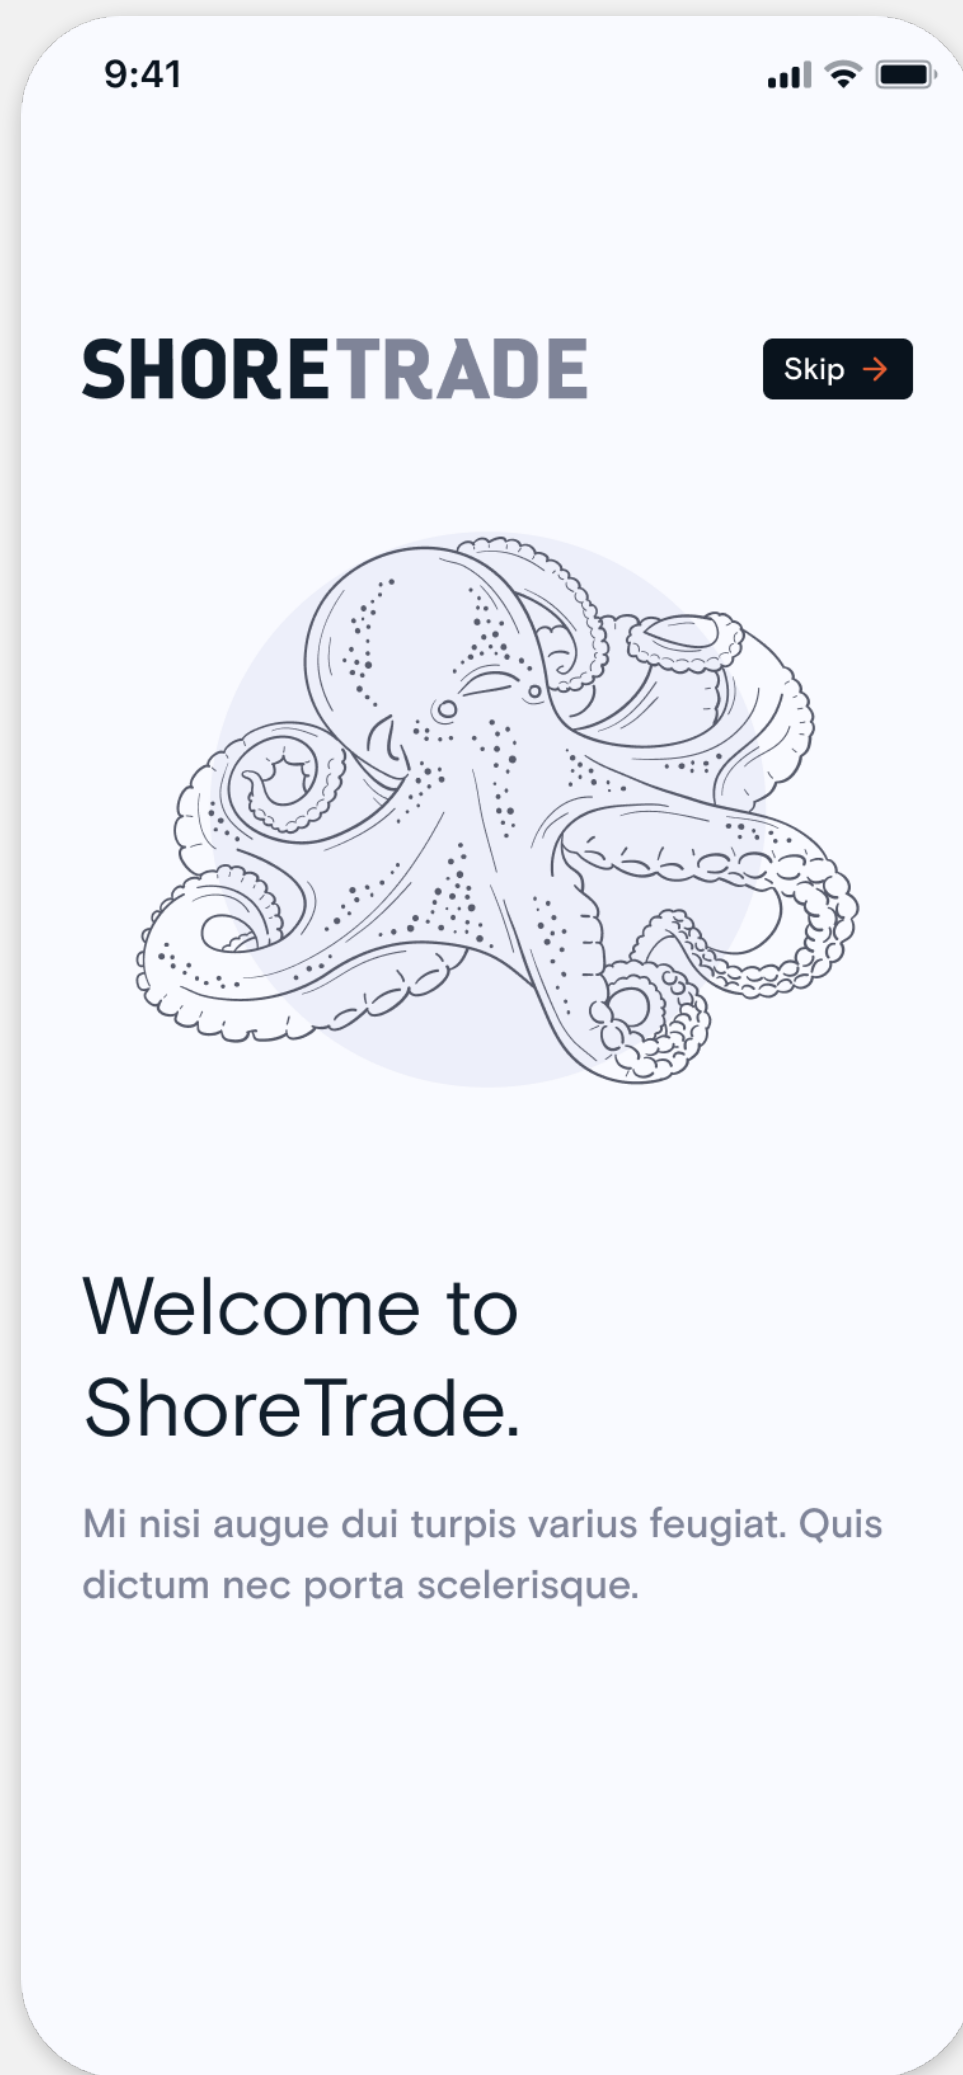

Leading 3-4 developers with the help of a very talented design studio, we created 2 mobile apps and 3 web apps concurrently. We opted to use Typescript to ensure the systems were manageable and in-sync, and to ensure crash rates are at a minimum.

Services

- iOS App Development
- Android App Development
- Web App Development

Impact

- 60% Code Sharing between Web and Mobile
- Created coding exam for potential hires
- Lead and Code Reviewed 3+ Developers
- Direct management and collaboration with Designers, CEO and Client.

Hubble

We helped contractors, construction companies, engineers and architects reduce miscommunication while saving time and money in the construction industry.

Mainly as a mobile developer, I worked on many new screens and features in a specific module called "Fabrication".

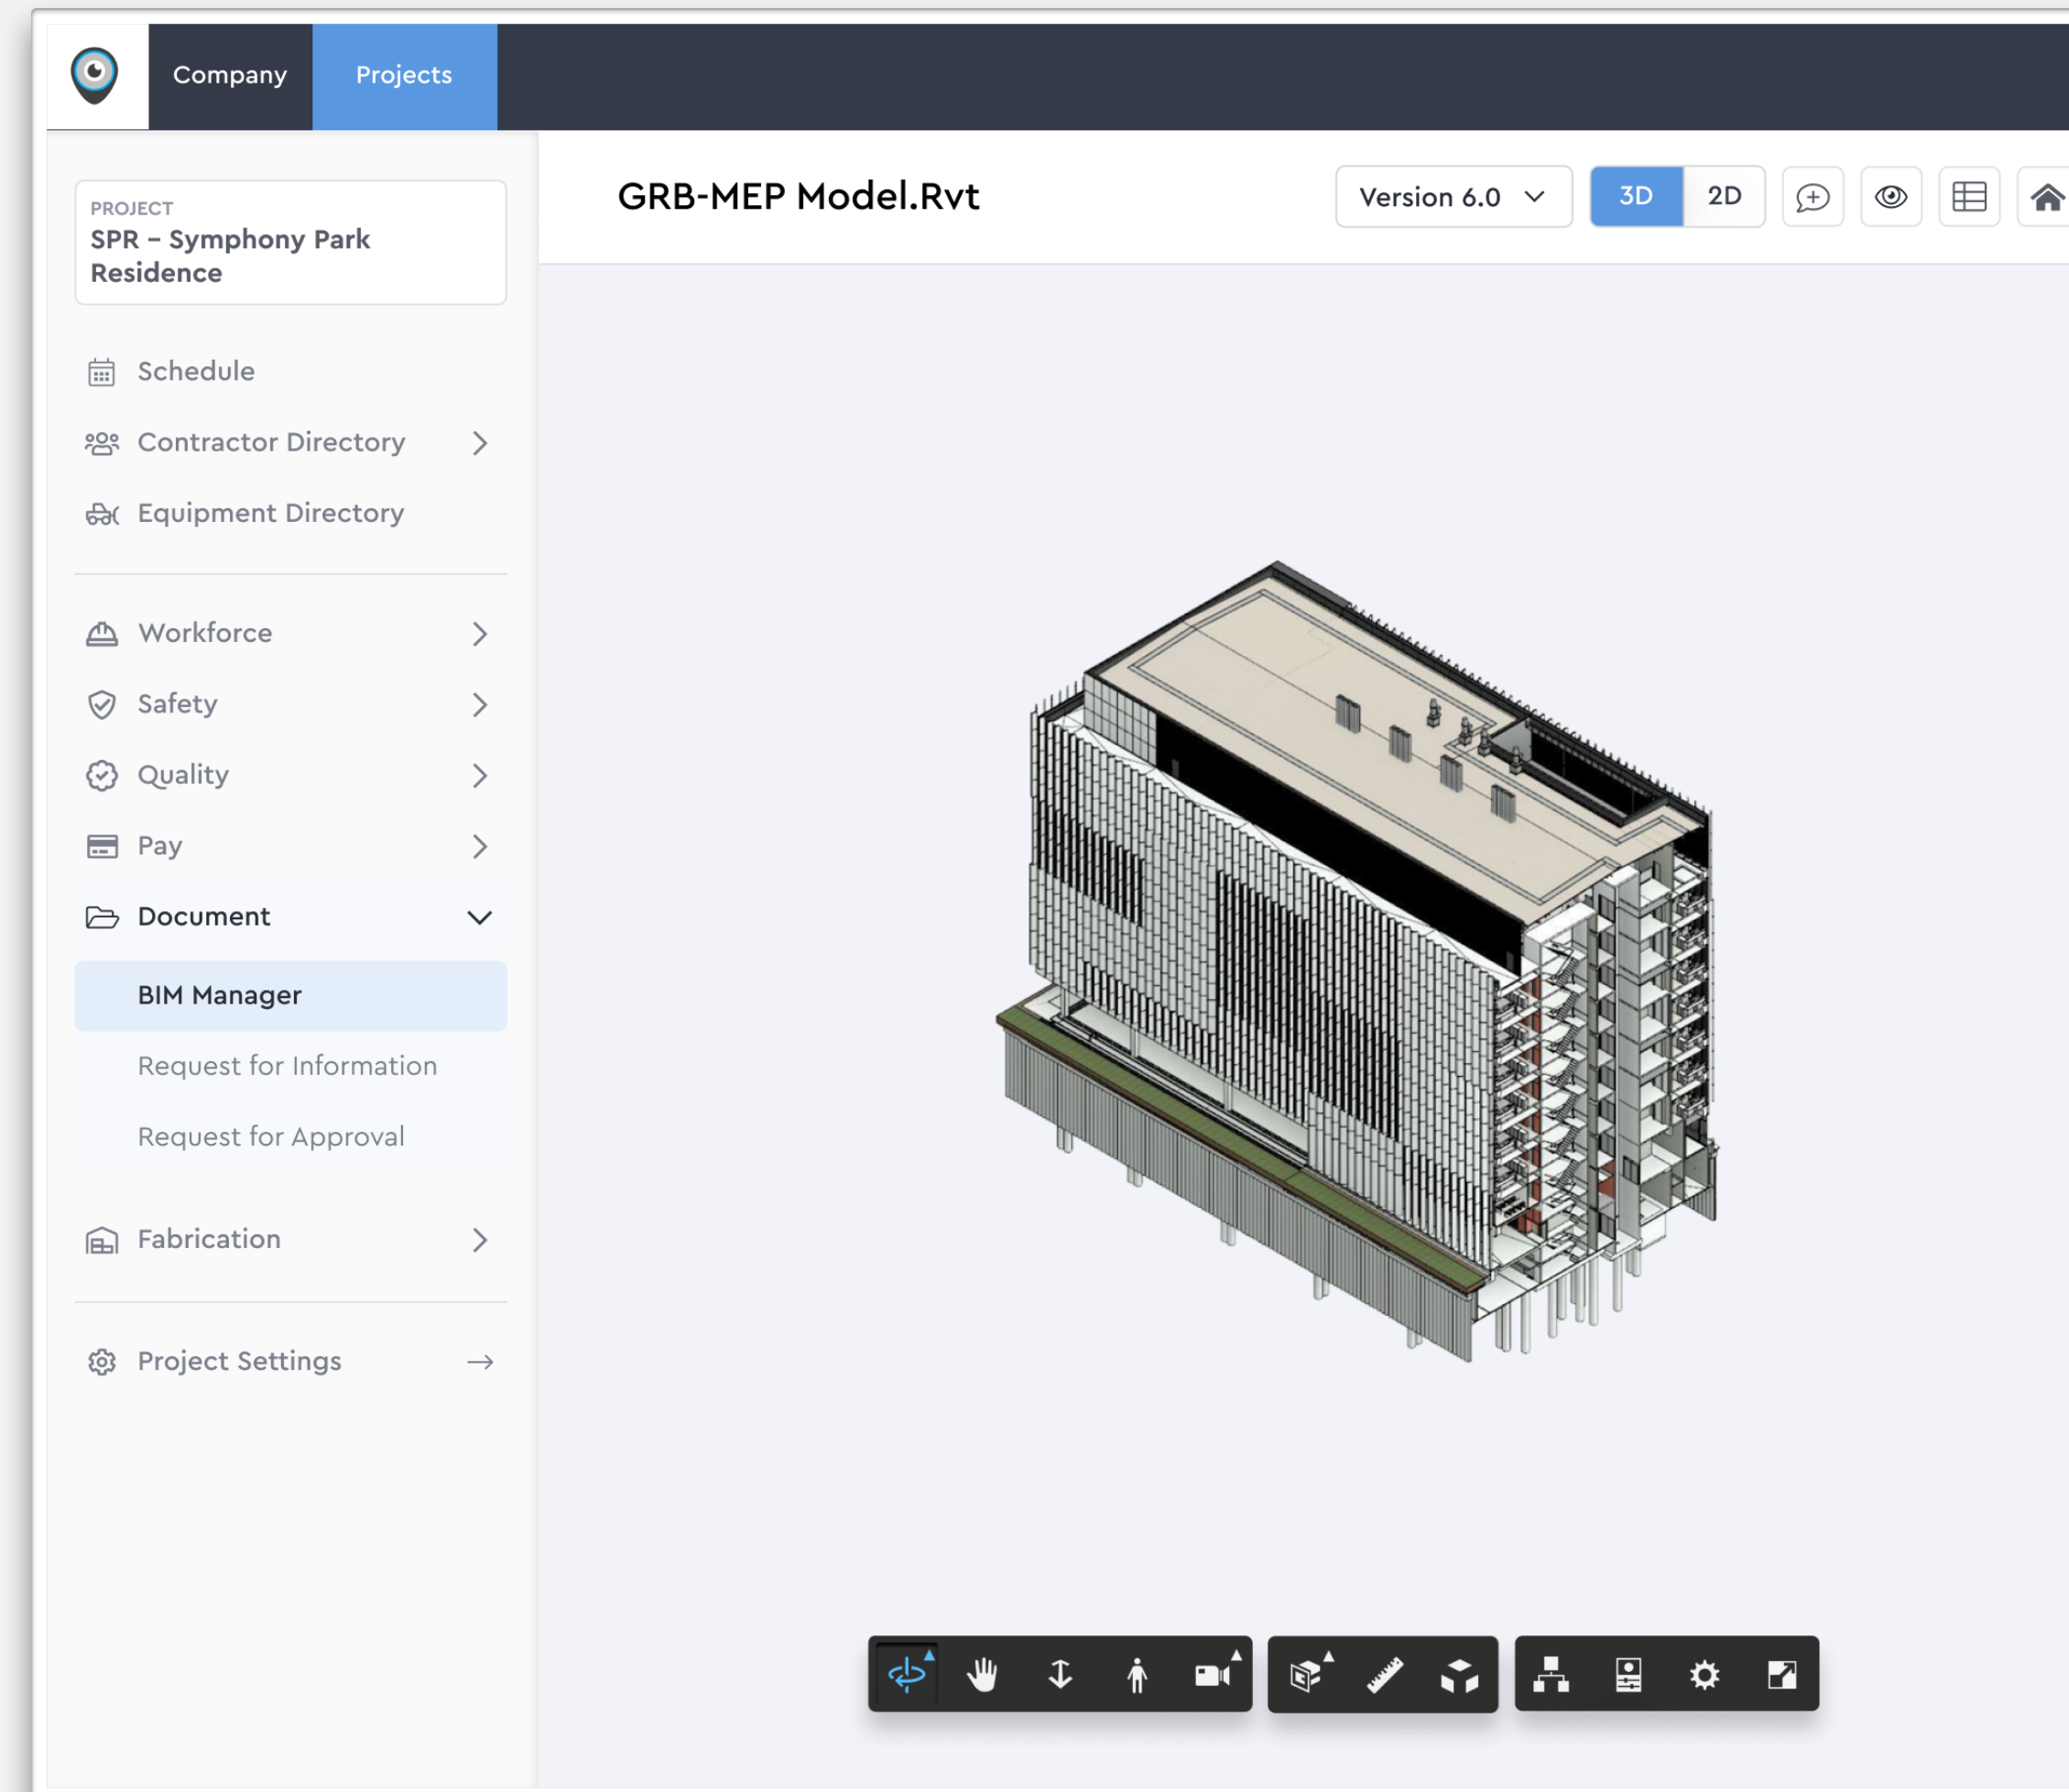

Fabrication helps suppliers, contractors and RE / RTOs get a high overview and analytics of when Fabrication Elements get created, shipped and deployed. Modules and Features were shared with other modules, so collaboration with the other team members was a must.

Services

- iOS App Development
- Android App Development
- Website Development

Impact

- Contributed to 43 screens
- Interviewed potential developers
- Independent ownership of module.

Asia Car Service

While working at Symph, we helped the Asia Car Service achieve Quality Transfer & Chauffeured Transportation Services in Asia.

Allowing them to transition from manually scheduling bookings, calculating payment, and receiving payments into doing it all on the app.

As the Mobile Developer, I worked on the Rider, and Driver apps, the features developed consisted of creating, and accepting a booking, scheduling bookings ahead of time, and real-time location tracking to view the mileage, route to determine the pricing.

Services

- iOS App Development
- Android App Development

Impact

- 10,000+ Bookings
- \$1,000,000+ revenue generated through bookings

Yelsa

We quickly delivered 2 web applications and 2 mobile applications in 4 months with a 97.15% crash proof rate that automatically connects users with real estate agents

As a front-end developer working on the web and mobile, we needed to quickly rewrite and redeploy the app as the previous version had too many bugs and a bad crash rate.

We quickly rewrote and developed a coding architecture that shared 70% of the code and functionality between the mobile and web.

We leveraged typescript to keep the app crash proof and to make sure we can handle changes quickly between the shared code.

Services

- iOS App Development
- Android App Development
- Website Development
- API Development

Impact

- Saved the client 30% more budget
- 60% Shared code between web and mobile
- 97.15% Crash Proof Rate

Yelsa Connect: App in NZ for **Real Estate**

Run a free Buyer-Seller Match on Yelsa Connect, the one-of-a-kind online real estate connection service, bringing Buyers and Sellers together.

Try Yelsa Connect and discover the many benefits of our app for real estate!

LIST AS A BUYER OR SELLER

Testimonials

There are awesome engineers, and there are **AWESOME** engineers. Sean definitely falls in the latter category. I'm consistently amazed by his capacity to process information and vomit them out in words, in actions, and in code.

He's a very rare gem that can consistently create tremendous value to anything he touches. There was never a dull moment working with Sean and I consider myself tremendously fortunate to have worked with him. I would work with him again in a heartbeat!

Julius Uy

CHIEF TECHNICAL OFFICER • KYDON GROUP SINGAPORE
FORMER ENGINEERING MANAGER • RAKUTEN VIKI

I have always appreciated Sean's honesty. He is open with his team on the opportunities he wants to pursue and he challenges the people around him to also strive for greatness.

Due to his honesty, he is open about how he feels and expresses project or team issues he observes. I highly value this because he is quick to spot issues and is just as quick in proposing solutions to help make the situation better.

Ashley Uy

PRODUCT MANAGER • PLENTINA

Thank you.
